

Flowmeter

»FLUX« series

MAX

Art. No. 148207 Type No. 9000992610

Exemplary illustration

Thermal flowmeters of the »FLUX« series are the ideal solution for monitoring changes in flow and consumption, as well as for measuring leaks and energy efficiency. All flowmeters come with an M12 connection for power supply and signal management plus an analogue output that can be set to either voltage or current. For best results, use a straight pipe with a constant cross section and a minimum length according to the table (see data sheet). If straight piping is not installed, the accuracy may vary from what is stated.

They are available in two main versions: with or without built-in display.

The versions with display provide an intuitive user interface for several real-time information, including:

- flow rate, pressure and temperature
- graphs showing instant and cumulative quantities
- power consumption to generate the measured flow

The wireless versions can communicate with Ethernet networks and mobile devices via Bluetooth® through the dedicated "Metal Work FluxUP" app. In addition to displaying the measured values in real time, this app can be used to change all flowmeter settings and display the relevant data.

»FLUX« of sizes 1 and 2 can be mounted on »SYNTESI« maintenance units of sizes 1 and 2. If the device is fitted with a Syntesi® filter, the SYN filter parameter must be enabled in the system menu to guarantee the stated accuracy (function available only for the version with display). If the »SYNTESI« is fitted at the outlet of the »FLUX«, the straight pipe on the inlet side must still be guaranteed. »FLUX« of sizes 3 and 4 are installed directly in the pipes. Due to their size and weight, they are not intended for direct installation on maintenance units.

Technical data

Series	FLUX	
Size	2	
Operating pressure	0 - 10 bar	
Temperature range	0 to 50 °C	
Connection	G 1 IT	
Measuring range	0 NI/min to 4000 NI/min	
Analogue output	0 - 10 V / 4 - 20 mA	
Digital output	an allocated bit	
Display	with	
Pressure sensor	with	

Technical data

IO-Link	with
Function	flowmeter, flow switch, pressure gauge/switch, thermometer
Measured values output	via cable and display
WiFi	without
Compatible with app	no
Medium	filtered, unlubricated compressed air and neutral gases
Required purity class in accordance w. ISO 8573-1	4.7.3
Housing	aluminium
Supply voltage range	12 -10 % to 24 +30 % V DC
Operating voltage	10.8 - 31.2 V DC
Max. admissible voltage	32 V DC *
Hysteresis	adjustable
Flow direction	unidirectional
Measuring system	thermal
Protection IP	IP65
A	116.0 mm
B	87.0 mm

Before appliance \geq 200 mm straight section, after appliance \geq 50mm.

*IMPORTANT! Voltage greater than 32 V DC will damage the system irreparably.

FLOWMETER SERIES FLUX

The flowmeters in the FLUX series are the ideal solution for measuring the flow rate of compressed air in pneumatic systems. Made of an anodised aluminium body from 1/2" to 2" threaded ports, they can measure flow rates of up to 15,000 NI/min.

Available in two main versions: with or without built-in display. The version with display provides an intuitive user interface for real-time several information, including:

- flow rate, pressure and temperature;

- graphs showing instant and cumulative quantities;

power consumption to generate the measured flow.

This version also integrates a pressure/temperature transducer that uses an advanced software algorithm to minimise measurement error within the operating range.

All flowmeters come have an M12 connector for power supply and signal management plus an analogue output that can be set to either voltage or current; the models with display also feature a configurable digital output (on the flow rate, pressure or total consumption). They can be powered with variable voltage ranging from 12VDC to 24VDC and act as either a flowmeter and flow switch; additionally,

The display versions can be used as either a pressure gauge or pressure switch. Internal air channels are designed to ensure an accurate flow rate reading at all times without creating any pressure drop between the instrument inlet and outlet. The wireless versions can communicate with Ethernet networks (via MQIT protocol) and mobile devices (smartphones and tablets) via Bluetooth[®],

through the dedicated App "Metal Work FluxUP". In addition to displaying measured values in real time, through this App, you can change all flowmeter settings and view the relevant data.

TECHNICAL DATA		FLUX 1	FLUX 2	FLUX 3	FLUX 4		
Measured flow range	Nl/min	0 to 2000	0 to 4000	0 to 8000	0 to 15000		
Fluid		Compressed air free of any lubricants and inert gases					
Fluid temperature	°C	0 to 50					
Direction of flow			Unidire	ectional

						ĩ

Accordary reteries to compressed an gas, or a pressure of 5 bar and a non-ampending emperations of 20 ± 10 ±.
If in order to guarantee the stated measurement accuracy and to preven lubricant residues from damaging the measurement sensor, a filter has to be mounted at the FLUX inlet.
If the device is fitted with a Syntesi, filter, the SYN filter parameter must be enabled in the system menu to guarantee the stated accuracy (function available only for the version) with display).

- Version without display: the digital input selects the type of analogue output from 0 to 10 V and 4 to 20 mA.
- Available only for version with display.

COMPONENTS

- BODY: anodized aluminium
 INLET BUSHING: anodized aluminium
 FLOW RECTIFIER DISC: passivated aluminium
 CONNECTOR M12: technopolymer
 ELECTRONIC BOARD
 FLOW SENSOR
 COVER: technopolymer
