

Flowmeter

»FLUX 0« series

Art. No. 148230 Type No. 9000978V2

Exemplary illustration

Thermal flowmeters of the »FLUX 0« series are miniaturized devices used for monitoring changes in flow and consumption, as well as for measuring leaks and energy efficiency. They come complete with push-in fittings. For the best results, the input pipe must have a straight section of at least 80 mm in length or more, otherwise the measurement will be inaccurate. They have two digital outputs and one analogue output, each of which can be freely set to measure the instantaneous flow rate, the accumulated flow rate or the pressure, therefore they can perform the function of flowmeter, flow switch, pressure gauge or pressure switch.

FLOWMETER SERIES FLUX O

The flowmeters FLUX 0 series are miniaturized devices used to measure air flow rate. They come complete with push-in pipe fittings.

Numerous functions can be viewed and set on a three-colour display. They have 2 digital and one analogue outputs, each of which can be freely set to measure the instantaneous flow rate, the accumulated flow rate or the pressure, therefore they can perform the function of flowmeter, flow with pressure across a pressure property.

flow switch, pressure gauge or pressure switch.
They feature reduced dimensions, with a width of only 17 mm.
The FLUX 0 flowmeters comes in two models: one for flow rates up to 50 NI/min, the other up to 200 NI/min, and are can be powered at 12 and 24 VDC.
